

Modelling large quantities of Clay is perhaps the most interesting of all Art Materials to boys and girls! If you live near a stream or a river, Clay can be dug out for yourselves.

Modelling has great possibilities and fewer tools are needed than in any other medium.

The Fingers are the chief tools!

Clay can be shaped into any form that your creative mind suggests.

Modelling naturally leads on to making Pottery, and boys can build their own Kiln to fire their pots and Models.

The moulding, coiling, and throwing of Clay on the potter's wheel is a most fascinating occupation.
